Key Messages

- No discernible consumer reaction to events in the Middle East – quite the opposite.
- Retail sales values (exc fuel) grew +4.1% YoY in March, with volumes ahead by +1.7%. For Q1 as a whole, values were up +5.0% YoY and volumes +3.4%.
- Inflation rose in food to +3.7% (from +2.6% in February). However, non-food inflation is tracking considerably below headline CPI (+0.9% vs. +3.3%) and many categories remain deflationary.
- Consumer confidence dipped to its lowest level since October 2023 in April. While inflation will continue to rise in the coming months and volumes will come under pressure, this is not a precursor to a consumer meltdown.
